

## Objective

I am a interactive designer and front-end developer and I'm in my final year at Rochester Institute of Technology. I'm passionate about designing and developing interactive experiences, exploring through web, mobile, and more. Currently experimenting with pushing the boundaries in what interactivity means on the web using cutting edge tech such as WebGL. I'm looking for a opportunity to start my career at a creative company thats goals align with mine. My goals are to work with a collaborate tight knit group that fosters growth and learning in the design and tech field.

## Work Experience

### THR33FOLD - Creative intern (June - August 2014)

Had an awesome time working as a creative intern doing web design, front-end dev, working with wordpress, mobile design, 2d animation and social media.

### Bumblebee - Freelance (May - August 2012)
